

*Dear friend and colleague,*

*This summer I am stepping down as ORPRN Director. It has been a special sixteen-year run of being inspired by you, and other partners as we strive to improve the health of Oregonians. I have been honored to lead community-based and practice-based research, and to implement new models of care. I hope to connect with you to share my appreciation for all that you do at the ORPRN Convocation and Reception on April 12th.*

*LJ*
